

NEXT GENERATION COLD ASPHALT

LOOK FAMILIAR?

FIX POTHOLES PERMANENTLY
GET EZ STREET

WORKS IN WATER • TRAFFICABLE IMMEDIATELY

EZ Street Bioblends® is a premium, polymer modified cold asphalt, for the permanent repair of pot holes, utility trenches, edge repairs, and is also ideal for the ramping of trip hazards on roads, footpaths, around man holes and utility service covers.

THE DIFFERENCES > THE FACTS

Unlike standard cold mix, EZ Street Bioblends:

- Is a permanent fix!
- Works in water
- Is flush and bleed free
- Can be stockpiled for 6-8 Months

Unlike hotmix asphalt, EZ Street Bioblends:

- Requires no tack coat
- Can be placed in wet weather
- Is trafficable immediately
- Requires no heating - no risk of burns
- Does not fume
- Is easy to use

THE ADVANTAGE > YOUR BENEFIT

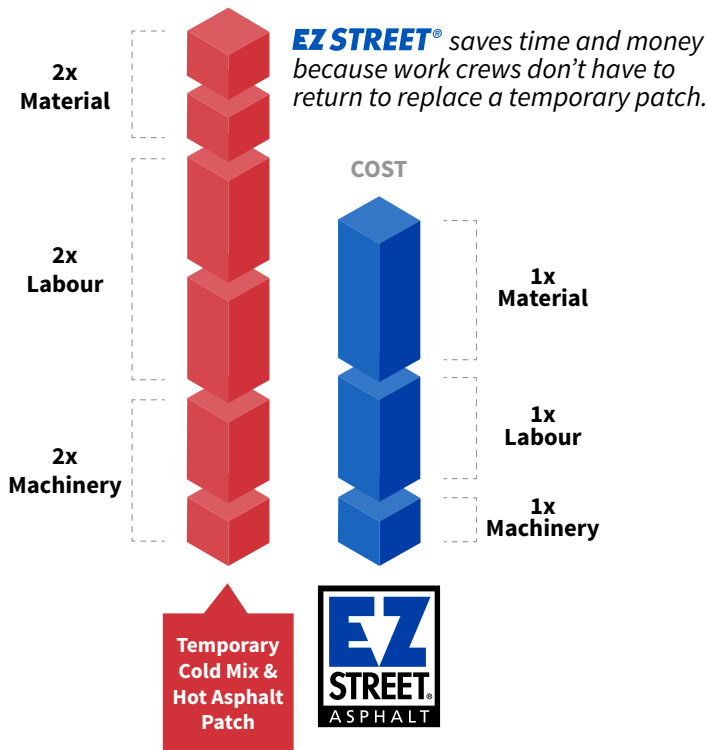

- Can be used in all weather conditions to permanently repair pot holes, utility cuts, edge repairs and trip hazards.
- Save thousands of dollars in costly follow up repairs.
- Maximise efficiency – is trafficable immediately, repairs completed with minimal preparation, meaning less inconvenience to the public.
- Saves time and money spent on the job – repairs are completed quickly and efficiently.
- Use **EZ Street** in water—eliminate wet weather down time and it's permanent.
- Stockpile EZ Street for 6-8 months and use it anytime. No more running between asphalt plants or down time while the plant is closed.
- No tack coat required.

**PERMANENT COLD ASPHALT

1 TONNE BULK BAG * or LOOSE BULK

Minimise your costs by purchasing EZ Street in either one tonne bulk bags or in loose bulk. Realise significant cost savings in your maintenance budget, when you buy in bulk.

~17m² @ 25mm

~8.5m² @ 50mm

~4.5m² @ 100mm

*Spread rates based on using 1 tonne bulk bag of EZ Street

INSTALLATION GUIDE > 3 EASY STEPS

STEP 1

SWEEP

Sweep out the area to be patched. Make sure to remove all loose debris, broken pieces of pavement, and dust.

STEP 2

FILL

Place EZ Street in layers of 25-50mm, ensuring material is placed ~25% higher than the existing pavement.

STEP 3

COMPACT

Compact EZ Street with a hand tamper, vibratory plate, or small roller.

REDUCE YOUR CARBON FOOTPRINT

EZ Street Bioblends[®] is our way of helping the environment and reducing our reliance on non-renewable resources. Using an Australian produced, canola derived bio-fuel, we have eliminated the need to use standard fossil fuel fluxing agents. This has resulted in a significant reduction in our carbon footprint for Australia's bestselling, best performing cold asphalt. The new EZ Street Bioblends delivers enhanced workability, safer handling and superior performance, with much less impact on the environment. EZ Street Bioblends is another response by Fulton Hogan to environmental conservation and the challenges of climate change.
